

FOR IMMEDIATE RELEASE

AIR-TRANSPORT IT SERVICES, INC. ADDS PULKOVO SAINT PETERSBURG AIRPORT, IN ST. PETERSBURG, RUSSIA TO THE LIST OF PROGRESSIVE AIRPORTS UTILIZING AIRIT'S ADVANCED OPERATIONAL SYSTEM SOLUTIONS

April 11, 2011, Orlando, FL – Air-Transport IT Services, Inc. (AirIT), a key provider of diversified information technology products and services to the air transportation industry, today announced that they are providing an advanced operational system solution to Pulkovo Saint Petersburg Airport in St. Petersburg, Russia. Pulkovo Airport is the gateway to St. Petersburg and to the entire northwest of Russia; it is Russia's fourth-largest airport after the three airports serving Moscow. The addition of this technology to the airport will help bolster the airport's operational efficiency and allow them to deliver an enhanced level of passenger service to their customers.

The integrated operational system suite being deployed in St. Petersburg will include, AirIT's robust Airport Operational Database (AODB), Flight Information Display System (FIDS), Resource Management System (RMS), Slot Management, Shift Planning, an advanced message broker supporting interfaces to AFTN, SITA and an ERP system and AirIT's Enterprise Service Bus (ESB). The added efficiency provided by these tools will greatly reduce airport costs and allow the airport to drastically improve their service levels, while simultaneously helping the airport to reach its goal of becoming a world-class airport.

In addition to the efficiency and cost savings they will now deliver to their airline partners, the ancillary value to the airport lies in its ability to better leverage and utilize facilities and ultimately enhance their ability to maintain and attract new air service. Betros Wakim, CEO of AirIT, states, "The contemporary solutions being deployed in Pulkovo will provide an immediate measurable benefit to the airport and its passengers. AirIT is proud to continue our growing international expansion with this new project. Clearly, the airport is demonstrating its commitment to become a world-class facility and provide first-rate passenger service by making these necessary infrastructure investments." Dirk Rebhan, IT Director Pulkovo Airport adds, "After an extensive competitive process, AirIT stood out as the clear choice to provide the operational systems because of their experience, value and exemplary history of delivering projects on-time and on-budget."

About Air-Transport IT Services, Inc.

Air-Transport IT Services, Inc., with corporate offices in Orlando, Florida, offers airlines and airport IT systems that enable them to deliver, display, manage and employ information that improves operations, customer satisfaction and revenue generation. The company's airport operational, passenger processing and revenue management solutions are the most comprehensive offerings available to the global air transportation industry.
