

**FOR IMMEDIATE RELEASE**

**AIR-TRANSPORT IT SERVICES, INC. PROVIDES BAGS TO GO  
ENTERPRISES SOFTWARE FOR REMOTE BAGGAGE CHECK-IN FOR LAS  
VEGAS MCCARRAN INTERNATIONAL AIRPORT**

**May 30, 2006, Las Vegas, NV** –Air-Transport IT Services, Inc. (AirIT), a key provider of diversified information technology products and services to the air transportation industry, today announced that they are providing their Baggage Off-Site Secure (BOSS by AirIT) software for the tracking of luggage checked in remotely at hotels in Las Vegas. Last week, Bags To Go Enterprises started operation of their remote baggage check-in service enabling travelers to check in their luggage in the lobby of The Venetian Resort Hotel and Casino, with Bags To Go assuring that the bags will be delivered directly and securely to the TSA screening facility at Las Vegas McCarran International Airport. Once screened at the TSA facility, the bags are handed back to the Bags To Go staff to deliver to the Airlines. AirIT’s BOSS software provides Bags To Go, the Airlines, and the TSA with a software tool to track and account for all the baggage throughout the pick up and delivery process. The software also provides Bags To Go, the TSA, and the Airlines detailed reporting capability.

“The primary goal of BOSS is to provide the user a tool to track the luggage through its chain of custody, and the secondary goal is to provide authorized users the information needed to help manage their business. Bags to Go, TSA and the Airlines can get the status of any of these bags at any time to help them run their business. For example, an Airline can check how many pieces of luggage have been checked, where are these pieces of luggage, and if they are in route for delivery” said Mr. Betros Wakim, President and CEO of AirIT.

Bags To Go was founded by CEO Keith Wiater, who successfully launched the service in Ft. Lauderdale, Florida with favorable reviews from members of Congress, the TSA and airport management executives nationwide. Mr. Wiater, along with Las Vegas McCarran

International Airport plan to expand the service to other hotels and airlines in Las Vegas. Mr. Wiater also has plans to expand the Bags To Go service at other airports in the coming year.

Mr. Wiater notes that fears of terrorist activity and increasing levels of baggage theft are just two of the most visible reasons why a traveler would utilize his service. “With AirIT’s technology, we can ensure that the luggage is securely tracked from the lobby to your plane. BOSS by AirIT provides everyone involved with the transparency needed to make sure the luggage get to their planes securely and on time.”
