

FOR IMMEDIATE RELEASE

AIR-TRANSPORT IT SERVICES, INC. AWARDED EXCELLENCE IN SUSTAINABILITY THROUGH INFORMATION TECHNOLOGY BY ITFLORIDA.

November 18, 2009 – Air Transport IT Services, Inc., a world leader in providing turnkey integrated solutions to the transportation industry, is proud to announce it has been recognized for the Excellence in Sustainability through Information Technology Award. ITFlorida and its Board of Directors, whose mission is to make Florida a leader in high tech advancement, has acknowledged AirIT with its Excellence in Sustainability through Information Technology Award at its 7th Annual Awards Gala and Tech Forum, held at the Disney's Yacht Club Resort. ITFlorida, an umbrella and not for profit membership organization, represents Florida's diverse information technology communities on a statewide basis.

The Excellence in Sustainability through Information Technology Award recognizes AirIT for creating new information technologies and applications which has contributed to better energy practices and policies through efficiencies and conservation. "It is a tremendous honor to receive this award," said Betros Wakim, President & CEO of AirIT. "We continually strive to provide our customers with the world's best integrated air transport solutions focusing on airport operational optimization which contributes to a significant improvement to their operation and reduction in carbon emissions."

AirIT has a complete operational suite of products that allow airports to reclaim airport assets and take control of the gate, ticket and ramp resources while reducing operational cost and improving customer service. AirIT solutions, to name a few, include its innovative common use system (EASE), airport operational database, information display system and mobile and immobile resource management system. These solutions provide the airport operator with a more effective means of reducing aircraft taxi and dwell times thus reducing aircraft fuel burn and carbon emissions. Additionally, the systems allow airports to handle more aircraft capacity which reduces their carbon foot print by eliminating the need for the construction of new facilities. "The buildings that are the most beneficial to the environment, or Green, are the ones that don't ever have to be constructed," says Mr. Wakim.

About Air-Transport IT Services, Inc.

Air-Transport IT Services, Inc., with corporate offices in Orlando, Florida, offers airlines and airport IT systems that enable them to deliver, display, manage and employ information that improves operations, customer satisfaction and revenue generation. The company's airport operational, passenger processing and revenue management solutions are the most comprehensive offerings available to the global air transportation industry. AirIT solutions are based on open systems and run in a client/server and web based environment. In addition to its product offerings, AirIT also provides consulting services, networking and installation and 24 x 7 support.
